Testing with the Central Processing System

The certification testing process is required for all **new** Electronic Data Exchange participants who will not be using the EDEExpress software to process ISIR data and create history corrections. This testing should take place after all enrollment forms for Title IV Wan have been filled out and submitted and the network connectivity test completed. Users only need to complete the section of testing outlined below for the processes they wish to become operational for the 1998-99 cycle as a new EDE participant. After the first cycle of processing ISIR and/or history corrections, certification is not required. The operational status will be rolled over for the next cycle by the Title IV WAN system. For users who have completed certification testing in the past yet wish to receive the 50 test ISIR records, you may also request the file by calling the number listed below.

To begin the process users will need to contact CPS Customer Service at 1-800-330-5947. CPS will then send a file containing 50 test ISIRs to the users network mailbox. This file will need to be down loaded from the network and brought into the user's system. After printing a sample of these ISIRs to verify that this process has worked successfully, make corrections to 10 of the ISIRs as specified in the following section. This will entail entering changes to various fields on student records and saving these revisions. Once all updates are entered, the user's system should batch up the corrections into a CORR99IN.DAT file which the user will need to transmit to the network via EDConnect. Within 3 days a representative from CPS will contact the user with the results of the test. If the file is in the correct format, users may begin submitting live correction data in 2 days. If there were errors with the correction file, users will need to make the suggested changes to their system and resubmit the full correction file again.

If a new user sends in correction files created from a non-EDEExpress system a fax will be sent from CPS. The fax states: We recently received a batch of electronic corrections via the Title IV WAN network that we are unable to process. According to our records, you have yet to complete the electronic correction testing for the 98/99 processing year. To ensure that the EDE processing software you are using can generate electronic information in the correct format, you will need to send us the 10 electronic corrections outlined in Sect. 5 pages X-X in the Electronic Data Exchange Technical Reference manual for 1998-1999.

Note to 3rd Party Vendors and Custom System Participants already certified operational: The test cases mentioned above can be used to test your systems. Simply call CPS Customer Service and request the 50 test cases be placed in your Title IV WAN mailbox. Ten of the 50 test cases have been run through the compute process of the CPS and are "realistic" scenarios of student paper applications. The history correction cases provided on the subsequent pages are corrections to these 10 ISIRs. Copies of the 10 printed ISIRs are provided in the section for reference purposes.

History Correction Test Cases:

To better assist in testing the history correction process, 10 of the 50 test ISIR records which you can receive from the CPS have been run through the CPS compute process. The following history test cases can be used as stand-alone corrections (those without an ISIR on file) or corrections to the corresponding ISIR in the test file. Use the following correction cases to test the history correction process with the Central Processing System (CPS) or to test vendor software correction processing:
